RAIL COMMISSION EXPECTS
TO BE IN NEW BUILDING
BY APRIL 14

[BY A P NIGHT WIRE]
SAN FRANCISCO, March 27.—
The State Supreme Court is moving today into the \$2,000,000 State Building, recently completed in San Francisco's civic center. The State Railroad Commission expects to be in the new building by April 14.

The offices to be established in the new building are those of the Attorney-General, Supreme and Appell'ste Courts, Highway Commission, Governor's office, Sutre Library, Industrial Accident Commission, Civil Service Commission, State Corporation Commission, State Mining Bureau, State Board of Charities and Corrections and the State Fish and Game Commission. On his visits to San Francisco in the past, the Governor has been obliged to make his headquarters at a hotel.

The new building was erected on a \$2,000,000, forty year, 4½ per cent bond issue, calling for an annual interest charge of approximately \$65,000. At the time its erection was ordered the State was a since increased to a sum approximating \$100,000.

The State Senate this afternoon passed a bill carrying this appropriation by a vote of 33 to 15. Last week the lower house indicated conclusively that it will take similar action, when it voted with a two-thirds majority to take a measure identical with the Senate measure passed today out of the hands of the House Appropriation Committee and place it on the calendar.

In a first round match for the Pebble Beach cups, a novice event, the Eleventh Cavalry of the Monterey Presidio defeased Midwick, 19 to 2. As the score indicates, the cavalry rode rough shod over the aggregation of inexperienced players that sported the purple for Midwick.

Capt. C. A. Wilkinson gave an exhibition of mailet work and heady placing of himself in position that gave the crowd some thrills.

Midwick was strictly up against it. Lafayette Hughes was the only one of the big four which has swept the Coast polo honors for the last couple years, eligible for the novice event. His regular position is number one, but he dropped back to four, and worked like a beaver to stop the offensive that was launched at his goal posts.

Gerald Cudahy played in his first polo game and acquired quite a little experience. He scored a goal in the seventh period, the first for Midwick and was roundly cheered, Infayette Hughes put through

Both Matmen Are Train to the Minute

Local Man Will Have Bij Ringside Following

Now here is a grappling hookup that should make the tingle from start to finish-Johany Meyers vs. Sammy Sandow. Meyers, who is middleweight champion of the world, expects to have a lot of trouble making an im-print of Sandow's shoulders on the mat at Hollywood Stadium to-night. Sammy has a big following

in Los Angeles—a following that is almost sure to be at the ringside tonight giving their mas
plenty of moral support.

Both wrestlers are trained to
the minute and neither will have
any excuse as regards lack of condition if he is thrown. Sammy feels
he has an excellent chance to cop
the persimmon simply because he
went two hours to a draw with
Meyers the first time he grappled
with the easterner. At that time
f. andow hurt his arm early in the
fracas and yet was able to stand
off the champion.

Another reason advanced by
Sammy as regards his having an
even chance with the title-holder
is the fact that Meyers's record
since he met him is not any too
brilliant. In other words, he
feels that Meyers has little chance
to improve and therefore he enters this contest fully confident he
will hold Johnny to a draw or better.

Probably there are few more prominent victims of those branding vagaries than William "Wheeser" Dell of the Vernon club, and one of the leading righthanders of the Pacific Coast League,

leading righthanders of the Pacific Coast League.

Mr. Dell's parents never intended he should have a substitute for that William which they fondly tacked onto his luberited name. Neither is there any particular reason why. If he was to be micknamed at all, he should be embellished with such a noise as Wheeser, which suggests a leaky rear tire. This is not at all remindful of Mr. Dell, who seldom blows. Furthermore, outhose rare occasions when he does blow, it is with a loud bang, and not a gentle whistling soind like the expiring gasp of a weak inner tube.

When Dell was a mere kid around his home-town neighborhood, other kids, having no respect for his brilliant future, which they recked not of for some Fucrutable reason, began calling him "Weis." That was the beginning of his present appelation. Later it was evaluaged to Weiser. Some were inclined to couple this to the fact that Dell subsequently played ball in the vicinity of Weiser. Idaho. But he says that they were calling him Weiser, and he was running to meet them when he was called thus, long before he pland baseball.

Anyway, the name stuck, and he was so known until he went to the St. Eouis Cardinals in 1910. Then some bigleague scribe, either through a misuake or with malice afore-thought, changed it to Wheeser" in one of his reports of a game, and thus the big righthander has remained labeled, on no good grounds whatsover, down to the present day.

Dell this season strikes one

Dell this season strikes one as in better shape than last spring. At that time, winter baseball had cut figsin his weight. Today he is over the 200 mark, and at his best. It is not adipose tissue, but solid stuff, due to hard work as a telephone lineman, in which occupation he dug enough holes to make a golf course reaching from Los Angeles to Portland. Or., and each hole large enough to permit playing of the regral and ancient game with a summire squash.

AUTO GOES SIXTY MILES ON GALLON OF GAS

WELCH (Va.) March 27.—An evolution in gasoline motor-engine construction is likely to de-dependent of the perfection, announced today, after seven years of experimenting, by S. S. Collier of new internal-combustion engine which tests so far have proved superior to present gasoline

Collier and other engine experts who have been studying his invention assert his new motor will attain an efficiency of approximately 65 per cent as compared with from 15 to 28 per cent attained by motors now in use. The Collier motor embodies the discovery of no new principles, merely a new application of the full powers of internal combustion engines. The inventor has solved the problem of applying the power of a motor, not to the piston, but to the rim of the wheel. He has the hard the problem of applying the power of a motor, not to the piston, but to the rim of the wheel. He has thus brought about increased leverage which is reflected in efficiency.

Collier says his motor will reduce displacement and fuel consumption to a great extent. It will enable an automobile to travel from fifty-five to sixty miles on a gallon of gasoline.

The motor, however, is not strictly a gasoline engine. It may be operated with steam, oil or compressed air, and by reason of its high efficiency a motor weighing 125 pounds will be large enough for any automobile. The new motor has one spark-plus, no pistons, no crankshaft, no gears, it contains only 117 parts, while a Ford motor has 352. Due to its simplicity, Collier is of the opinion it when made in another way and the form the form the form the form the contrains only 117 parts, while a Ford motor has 352.

SEALS PICKED TO WIN AGAIN

Miller again has McWeeny, Hodge and Courtney, in addition to those fingers who fought the Seal battles last season until their arrival. This gives them an edge ability, and no added outfielder apparently capable of replacing Jimmy O'Connell.

Ellison will again be at first. Kilduff second, Rhyne short with young Flaskemper being given his baptism in fast company at third. Should he flivver, Walsh, a veteran utility man will step in and attempt the Ajax stuff. If third can be plugged the infield will be ample.

be plugged the inneld will be ample.

But we will hasten along to the outfield. At present it consists of Joe Kelly, Gene Vaila, Tim Hendryx and Pete Compton. Kelly is being used in left-field, Valla in center and Hendryx in right. Thus we have a pleoe of veal sandwiched in between two tough old chops. Vaila, on the form which he displayed in Los Angeles last season, hardly seemed ready for regular duty. He is some better now. It is figured that being bounded on both sides by sage experience and hoary wisdom will help some.

STILL GOOD

Kelly is still a good player. Hendryx always has been a great hitter and still is. He probably will equal O'Donnell in this re spect. But he lacks Jimmy's Compton is a valuable man to be surprising to see-him playing regularly before the season is three months old. But the Coast

Jock has not resigned from Glenview, and he has no intions of doing so. The report that he was to give all his time to eshibition golf is erroneous. Jeck Hutchison is the outstanding professional golfer in America. He brings to golf what no other pro has ever duplicated—an extraordinary ability plus a personality that makes him instantly an interesting, figure. He also has added to the game a new shot, which he calls his "skid" shot. This shot gets wonderful results for Hutchison, and he is the only master of it in the game today. With it he makes the ball fairly skim over the turf and the edge of the green, then bite and hold.

Jock's skid shot is played with his famous mashie niblick. He uses the shot mostly from just off the green when the ball rests on hard ground. His stance for the shot is pronouncedly in front of the ball, with his hands well in advance of the clubhead. The hall travels low and first strikes the green some three or four yards from the pin. It appears to be going so fast that it would overrun the green by fifty yards or more, but on its second bounce it bites into the green and stops dead, sometimes with a little twist one way or the other. I have seen it run almost half a circle after biting into the green and with this currous twist roll into the cup.

Hutchison is vizierly unlike most players from the other. I have seen it run almost half a circle after biting into the green and with this currous twist roll into the cup.

Hutchison is vizierly unlike most players from the other side in that instead of playing silently he bubbles with jokes and comment as he goe around the links. When he is not talking to his opponent he adresses himself to his ball. He is always cheerful and nover resorts to the practice of viring to disturb his opponent's game by saying annoying things, as one of our prominent pros notoriously had the habit of doing.

Jock is the outstanding professional because he is a maser player, a great personality, an interesting man and swhale of a student of golf! Fine weather, coupled with per-fect course conditions, brought a record number of players to the Angeles Vista golf course last Sun-day, according to R. C. Noble, one public course. "The rush started early in the morning and continued until it was too dark to see the balls," said No-ble. "We broke all previous rec-

which played on any one day, and I believe that the people who played Sunday found the course in the best condition in which it has ever been."

A number of tourneys are being planned for the next few weeks, and during the current week an invitation has been extended to all members of the Los Angeles City Teachers' Club to spend a part of their vacation on the links.

Have you noted how many smiles now show prettier teeth, in pictures and in persons? And how much they add to beauty and to charm?

Such teeth were seen less often in old days. The change has come with a new method of teeth cleaning. People are fighting film. Millions have gained in the past few years a new conception of clean teeth.

You will use this method when you know it. The results are resistless. So we urge you to make this test.

Dingy, dangerous film

Film is that viscous coat you feel. It clings to teeth, enters crevices and stays. Food stains, etc., discolor it, then it forms dingy coats. Tartar is based on film.

No ordinary tooth paste effectively combats it. So, under old methods, beautiful teeth were more rare than now. Nearly everybody left some film to dim and destroy the teeth.

Film also holds food substance which ferments and forms acid. It holds the edd in contact with the teeth to cause decay. Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea.

Tooth troubles were constantly increasing. Very few escaped. So dental

A Beauty Secret 3,000 Years Old

The use of palm and olive olls to keep the skin fresh and smooth is nothing new, but a secret known to pretty girls as far back as Cleopatra.

Her Palmolive came in skins and jars, and she had to do her own mixing. But the beautifying cleanser she achieved was the inspiration of the mild, soothing blend science produces today.

Take a lesson from Cleopatra, who kept her youthful beauty long after girlhood's days had passed. She used cosmetics to embellish and enhance her charm, just as women do today. But the foundation was a skin thoroughly and healthfully cleansed from all clogging and dangerous accumulations.

Soothes and Beautifies

Palmolive is blended from the same palm and olive oils Cleopatra used—they are the mildest, most soothing ingredients science has been able to discover.

The scientific combination of these rare oils produces a smooth, creamy, lotion-like lather. Palmolive soothes and beautifies while it cleanses.

It keeps the skin of the face and body beautifully soft and smooth.

The Importance of Thorough Cleansing

It is absolutely essential to complexion peauty to wash your face thoroughly once a day. Palmolive makes this cleansing doubly beneficial by its mildness.

The profuse, creamy lather penetrates each tiny pore, removing the deposits of dirt, oil and perspiration which cause clogging and enlargement. Such cleansing is the secret of fresh, smooth skins, as results prove. It stimulates circulation, keeps the texture fine, smooth and youthful.

The woman who fears that washing will age her skin has used the wrong soap. She will change her mind once she tries Palmolive.

Don't Neglect the Body

Care of the complexion only begins with the face. Your neck is just as noticeable for beauty

or the lack of it—arms and shoulders should be kept white and smooth.

Use Palmolive for bathing and these results are accomplished. It does for your body what it does for the face.

If this seems extravagance, remember the modest price. The firm, long-wearing cake of generous size costs but ten cents.

Our Price Secret

If Palmolive were made in small quantities it would be a very expensive soap. Palm and Olive oils are most costly soap ingredients, and come from overseas.

But the popularity which requires enormous production has reduced the price to that of ordinary soaps. The Palmolive factories work day and night, the rare oils are imported in such vast volume that the manufacturing cost is reduced.

Thus Palmolive, priced according to quality, would cost at least 25 cents, is yours for a modest 10 cents. You can afford this greatest of all luxuries for every toilet purpose.

ALLIES READY TO TALK PEACE

Los Angeles Daily Times.

Will Inform Turkey Soon of Conference Results

Original Proposals Will Be Changed but Little

Sides Yet Far Apart, News That Reaches Paris

[BY CARLE AND ASSOCIATED PRINK.]
LONDON, March 27.—Turkey
Will be informed within the next
forty-sight hours that the Allies
are ready to resume the Lausanne
peace negotiations. The Allied delegates, who for the past week have
been examining the Turkish counter-proposal to the Allied peace
terms, finished their deliberations
this evening, after having drawn
up a reply to ismet Pasha's letter
of March 8.

It is understood that the Allies
agreed to make no fundamental
changes in their original proposals
to the Turks. What other modifications have been made are of
form, rather than substance. One
of the delegates told a correspondent that when the conference was
resumed the Turks would find the
Allies in complete unity on all
questions.

The French delegates will leave

The French delegates will leave for Paris tomorrow and the Ital-lans will leave Thursday.

The French designed with a realinns will leave Thursday.

BEPORTS ADOPTED

The Allied experts concluded their labors his afternoon and a plenary meeting of the delegates was held, at which the reports of the political, economic and judicial subcommittees were adopted. It is understood that the plenary meeting decided that Turkey's contentions on the following points were linadmissible:

First, separation of the economic and financial matters from the treaty; second, modification of the judicial clauses affecting the safeguards for foreigners; third, retrocession of Turkey of the Island of Casteloriza, now held by Italy. The delegates decided that the question of war lademnities was one for settlement between the Turks and Greeks themselves, and could be adjudicated fairly by a neutral commission of inquiry.

After discussing the Turkish demand that the Allies withdraw their armies from Constantinople and the straits on signing of the treaty, the delegates held that the army of occupation could not be withdrawn until the treaty befully ratified by all the governments concerned.

XET PAR APART

YET PAR APART PARIS, March 27—According to information reaching Paris, the Turks and the Allies are still far apart on many points connected with the peace settlement, and it is expected the resumption of the Near Eastern conference will depend upon the nature of the reply sent by the Angora government when it receives the Allies' answer, soon to be dispatched, to the Turkish counts: proposals.

It is understood the Allied communication will contain a list of points upor which the Allies are not disposed to grant any modifications.

FASCISTI IN SPAIN PLAN **GREAT COUP**

> Alfonso Unable to Force Statesmen to Task; Jaime of Bourbon Conspiring

[BT CABLE—EXCLUSIVE DISPATCR.]
[Cognight, 1923, by the Chicago Tebus.]
MADRID, March 27.—The Fascisti coup d'etat, with the prediction of a dictatorship for Spain, is expected imminently after the return of Senor Laguia, secretary of the Free Syndicate, to Barcelona from Italy where he has established connections with Premier

from Italy where he has established connections with Premier Mussolini's Fascisti party.

The chief of the popular party, in El Sol, the leading Madrid mewapaper, said today:

"I admit that a dictator has become necessary, but after the conduct of the Liberal government none of its members have sufficient capacity to exercise a dictatorship. We admit a dictator who in the name of justice and dignity will finish the dictatorships of these two parties (Conservative and Liberal,) a "black shird" dictator who will drive out the present political organization and establish a new basis of government."

Powerful political groups, including the patrons of the Barcelona nationalist organization urge a Fascisti dictator to prevent the development of Socialism and to oust the Liberals from power.

Don Jaime of Bourben, pretender to the Spanish throne, is reported to be conspiring at Paris to selze the power during the confusion attending the Fascisti coup. It is stated that King Alfonso is not able to force the statesmen to solve the present problems besset.

Timber Bonds Are Secured by-

TIMBER bonds generally have a two-fold security a manufacturing plant and equipment on the one hand and raw material on the other. Usually the raw material, standing timber, is the princi-pal security for timber bonds.

The demand for timber-a natural resource—is constant-ly increasing. In the past 10, years the annual consumption of timber has increased 25%.

The supply of timber on the other hand is constantly being diminished. We consume timber at a rate four times greater than the rate of growth. Year by year as demand overtakes supply, stumpage grows in value. Standing timber, therefore, possesses a stable able value under pract

Offering Diversity, Stability and High Average Yield.

(a) The General and Refunding Mortgage 5½% Gold Bonds of the Los Angeles Gas & Electric Corporation. The Company's property value is nearly double its total funded debt and its earnings nearly two and a half times the annual interest charges. A fundamentally sound high-grade investment. Price 97% to yield about 5.70%.

(b) The First Closed Mortgage Twenty Year 6% Bonds of the Waltham Watch and Clock Co. This sixty-nine-year-old business whose products enjoy a world-wide reputation, and whose earnings for the past quarter of a century have averaged five times the interest charges on this issue, is now entering a new era of activity with enlarged possibilities. These bonds are available at 98 and interest to yield about 6.15%.

(c) The 7% Cumulative First Preferred Stock of the M. A. Hanna Company. The old and widely known business of this company has earned an average of 22% per annum on its invested capital and surelus since 1885, and its net assets after deducting all liabilities, are equivalent to \$251 per share of the First Preferred Stock. The price is 102 to yield 6.85%.

We summarize as follows from a latter from Mr. Alfred L. Meyerstein. President of the Company:

HISTORY AND BUSINESS The Mohawk Oil Company, a California corporation, has acquired by purchase all of the properties previously owned by the Coalinga Mohawk Oil Company and the Continental Refining Company. Both of these properties have been successfully operated for some years past under the direction of Mr. Alfred L. Meyerstein, who will retain the presidency

The Company or its predecessors have been actively engaged for many years in the production of crude oil from their fee simple owned holdings of 160 acres in the well known Coalinga California field, and in the refining of their own and independently purchased oil at their modern, efficiently operated refinery in the same territory. The Mohawk Oil Company also owns six leases in the Santa Fe field, Los Angeles County, California, from which they are receiving net profits of approximately \$50,000 monthly from two producing wells.

SECURITY

These bonds will be a first mortgage on the below described properties, conservatively appraised at \$1,498,000, a valuation considered by the corporation officials to be substantially under the present market value.

1. 160 acres of fee simple owned proven oil lands in \$3 ection 12, Township 20 South, Range 15 East, Mount Diable Base and Meridian, Fresno County, California, producing approximately 20,000 barrels per month and conservatively appraised by Mr. Walter Stadler, well-known geologist, at \$798,000.

2. Modern efficient refinery, located on the Southern Pacific Railroad approximately one mile from the City of Coalinga, California, together with twenty-five miles of pipe line and storage tanks of \$2,000-barrel capacity, conservatively valued at \$300,000. The cash investment therein substantially exceeds this valuation. The refinery is excellently maintained and efficiently operated, with a long history of continued profitable operation. It is at present refining approximately 30,000 barrels of crude oil per month. Maximum capacity is \$0,000 barrels monthly.

3. Modern refinery to be erected in the Santa Fe Springs field, Los Angeles County, California, together with land and wholesale distributing stations to be erected thereon in the San Joaquin Valley, to be acquired through the proceeds of this issue at an estimated cost of \$300,000.

As additional security, there will be assigned to the Trustee six leases embracing 3.6 acres in the Santa Fe Springs

As additional security, there will be assigned to the Trustee six leases embracing 3.6 acres in the Santa Fe Springs field, Los Angeles County, California, from which a production of approximately 60,000 barrels monthly is now being received. Ir espective of substantial values placed on these leases justified by the present monthly net earnings exceeding \$50,000 and their future estimated normal production, as reported to us by Mr. Stadler, we regard the security directly mortgaged, including the Coalinga proven producing oil lands, refinery and equipment thereon, together with properties to be acquired, as ample security for the present issue of bonds.

The combined Coalings Mohawk Oil properties and the Continental Refining Company for the four year period ending December 31, 1922, show net profits averaging \$174,000 per annum, or approximately five times the interest requirements on this issue. The revenue of approximately \$50,000 monthly received from present production from two completed wells on their Santa Fe leases is not inleuded in the above statement. Earnings from the Coalinga properties could be substantially increased if the Company were to change their present policy of conserving the oil resources of their Coalinga holdings now producing 20,000 barrels monthly. The purchase of property and the construction of the additional refinery at Santa Fe Springs as above referred to should materially i increase the Company's profits in the future.

These bonds are offered if, when and as issued and subject to final permit by Honorable Commissioner of Corporations of the State of California.

All of the legal proceedings incident to the incorporation of this Company and the creation of its funded debt have been taken under the supervision of Mr. Joseph C. Meyerstein, acting for the Mohawk Oil Company, and approved by Messrs. Goodfellow, Eells. Moore & Orrick, on behalf of the purchasers.

Over four-fifths of our virgin forests are gone. We are now turning to the Pacific Coast and British Columbia for our lumber supply.

The properties securing the 7% Closed First Mortgage Bonds of the Stave Falls Lumber Company, Ltd., are located 35 miles east of Vancouver, B. C. They consist of 14,216 acres of standing timber, containing 168,000,000 feet of lumber, over half of which is high-grade cedar. It is conservatively estimated that this timber is sufficient to maintain the shingle mill at capacity for 29 years and the sawmill for 10 years.

Excellent transportation facilities, proximity to market and experienced and conservative mauagement are reflected in low operating costs. For the past 8 years the average net income has been more than 3.4 times the amount necessary to pay interest on these bonds and has never been less than twice that amount in any one year.

We recommend these bonds as a conservative investment having an excellent interest return. We will gladly supply further details upon request or, better yet, let our representative call ou you and explain in simple terms the exceptional merits of these bonds.

In the Great Oil Field Which Monday Yielded Another Mighy Gusher

The wonderful production possibilities of

the Meyer Sand at Santa Fis Springs are again proved by Julian Neu 1, which it is meed, came in Monday, after deep-

ening, for 8100 barrels of his h-gravity oil.

The Meyer, or lower sant, at Santa Fe Springs, is yielding some of the world's biggest high-gravity oil well. It has all ready produced the Keck we ll which was reported at \$200 barrels of 36 gravity oil—The Feix Well—the Baldwin. 1—the Elliott, 7000 barrels—the frial No. 1 with 6000 barrels, and the Russi II Well—all yielding high gravity oil, and all with settled production said to be, around 4000 barrels, or more.

The Royalty Department of Fred, El Poster & Company today offers royalty interests in a well in this marvelous oil field at a most respectible price. The well is now drilling at better trian 400 feet. It is bended to ge to the Mayer and. It is surrounded by producera—is in the neighborhood of the Keck and Folx, and on the same structure, as other big producers.

One per cent royalty in the grait Julian 1 at the reported production rate of 8,100 birrels of oil per day, figured on a 35 gravity basis, rotid yield \$117.45 per day, or 88,823.50 per month. The royalty we are offering will. In all probability, chard in production free, just such wells as have made the Mayer Band famous.

Only a few of these perceptly remain for sale. They are priced at a most

attractive figure. Come in and talk

SUGAR STOCKS

Pollowers of the sugar stocks are waiting until the air clears and it becomes possible to figure out the exact statistical position of the Cuban crop. However, reports of actual operations in Cuba are builish enough to satisfy the most exacting. Today two more sugar estates closed down, and it is expected that a dosen or so will followed this action within the next fortnight. Practically all of the estates which have completed operations have shown an output considerably below predictions made earlier in the year, and the street is taking this altuation as it best guide to the probable results

During the same quarter last year, the company operated at a deficit of \$277,000, but since then the company's plants have been running at a much higher rate, and prices have been marked up materially.

NEW YORK CENTRAL New York Central was off frac-tionally in response to the Febru-ary report which showed a deary report which showed a de-crease in net operating income. This road is the first of the larger systems to show a decrease for that period, but the fact that gross income during February showed a decided improvement and that net for the first two months of the year showed an increase of \$376,930 over the same period in 1922 was accounted as a

OIL LAND FIGHT IS LOOMING

Kern County Government Leases Are Disputed by Homesteaders

The Lake View Oll Company, that has a permit from the government to prospect on the southwest quarto prospect on the southwest quarter of Section 28, 32 south, 24 east, a mile northeast of the famous old take View gusher in Kern county, has demanded the protection of the government to allow it to exercise its rights under the permit.

J. H. Favorite, chief of the field division of the General Land Office at San Francisco, has made a survey of the situation, and made his report to U. S. Dist. Atty. Burke There are three homesteaders on the land, who have secured patent under the law of 1914, giving the homesteader the Burface right of the land, and having the homesteader the mineral rights to the government, and they insist upon their right to the mineral rights to the government, the position that under the law in force when the payment for the mineral rights were reserved to the government, and that the last named is interested in having the ol' corporation project its operations on the land as 5 per cent of the oil goes to the government.

Efforts have been made to secure an entrance upon the land, but the homesteaders are up in arms and it is said threats have been made to shoot anybody who goes in and begins drilling operations. Hundreds of permits to drill for oil have been issued by the government, with the agreement that a percentage of the oil goes to the government, and Registrar Valentine and Register valentine and Register register and Register valentine and Register v ter of Section 26, 32 south, 24 east

E XPOSITION PARK and Los Angeles' new Coliseum will be t of this great event commemorating the One Hundredth An of the Monroe Doctrine. Management is in full charge of the Picture Industry, whose unrivaled talent and concentrated for functioning to present a program of entertainment unequaled in sition history. The Premiere will be one of the most magnifi cles ever staged---and an unprecedented gathering of Stars Silver Screen, World Celebrities and Brilliant Personalities Science and Industry.

THE outstanding feature of this exposition will be the Historical Revue, portraying the high lights of American history, such as the Discovery of America, First English Settlement, First Continental Congress, Birth of the Stars and Stripes and the Declaration of Independence. A special committee of representative men and women from universities, schools and colleges are selecting the subjects to be included in this great patriotic program to be presented daily in the new Coliseum, with its seating capacity of 80,000 people.

Music will be emphasized during the Revue by one of the most complete, instructive and thrilling series of evolutionary interpretations ever given, beginning with the primitive strains that soothed the savage breast, down through the ages to the finished symphonies and the galvanizing jazz of today.

Evolution of the dance will be an enchanting feature of each evening's performance. Extraordinary attention is being given to selection of the terpsichorean classics that will be presented at the shrine of Human Grace and Beauty.

The Revue will mark a startling innovation in the display of industrial exhibits. Mounted on gorgeous floats, they will appear on the huge stage in the center of the mammoth Coliseum and be spotlighted in a dazzling setting of color while revolving before the vast audience. It is proposed to film each float while in action on the stage. This film, when complete, is expected to depict an illuminated industrial pageant more than five miles long.

The crowning feature of each day's program, staged in a symphony of color and beauty surpassing anything ever seen, will be the pyrotechnic dance of the ages a tribute to the artistry of the cinema.

The raid followed a watch of the Murphy home for four nights by investigators working under Dept. Dist.-Atty. Burke and George Contrerat.

The investigators reported that the liquors were handled by Mr. and Mrs. Murphy and thoir 14-year-old son.

The place was guarded by a savage dog, the investigators said, which prevented them from getting close to the house on the first might. But they managed to make friends with the animal, they said, and for the next three nights lay

**************** FIGHTER TELLS OF HIS CAREER

"My Twenty Years in the Ring," by Jack Britten, forr welterweight champion, which will appear exclusively in the sporting pages of The Times, beginning next Friday, tells in exy narrative style of the long experience of one of the greatest fighters in American boxing annals. Jack Britton ber est fighters in American boaring annais Jook Briton began his career when a lad of 15 years in Chicago. He was 35 years of age before he relinquished his title to Mickey Walker, the pres-ent holder, in Madison Square Garden, New York, last November. No fighter has ever held his own over such a long period of years and only one or two boxers of prominence have kept to the ring beyond the age of 30.

Starting with his championship bout with Walker in 1922, tton treks back over the long vista of his career. He tells of the sensational fight with Benny Leonard, and the much-disputed foul which gave him the title, of his mills with Ted Levis, Charley White, Mike O'Dowd and Packey McFarland. He gives the reader a peek behind the scenes, telling what goes on before

the reader a peek bening the scenes, tening what goes on before and after a big bout, how a fighter feels when he steps into the glare of the arc lamps—tricks of the fighting game—training difficulties—the unwritten laws of the profession.

To read Britton's story, "My Twenty Years in the Ring," is to catch a glimpse, in thirteen short articles, of the recent history of one of the most popular sports in the world.

MANY people deny themselves the comfort of a hot drink with meals, because they find coffee and tea detrimental to health. For many, the drug element in coffee and tea irritates the nerves, retards digestion and often prevents natural, restful sleep.

If this fits your case, try Postum. This pure cereal beverage supplies all the pleasure and satisfaction that a hot mealtime drink can give invigorating warmth, fine aroma and delicious flavor. And you can enjoy it in the full assurance that it cannot harm health.

Overnight to New York on the water level route

The Twentieth Century Limited is now operated in from two to five sections every day out of Chicago and out of New York with the same dependability of service as when a single train each way met the demands for reservations.

The ease and comfort with which the twentyhour schedule is maintained over the water level route of the New York Central is due not alone to the fact that the men who operate the Century have won their places by years of meritorious service—the picked men of a great organization—but also to the fact that year after year millions of dollars of new capital have been expended by the New York Central management in making this a better railroad.

Since the inauguration of the Century service, the property investment of the New York Central Lines has grown from less than \$900,000,000 to nearly \$1,800,000,000, and a considerable part of this expenditure has been made on the main traffic artery-the water level route from New York to Chicago.

The route of the Twentieth Century Limited has virtually been rebuilt in these two decades.

WOMAN TO TAKE GOATS

Ranch Owner Picked for Argentine Trip Because of Her Knowledge of Animals

Because raising goats is her business, Miss Irmagarde Richards, woman rancher of Montana, has woman rancher of Montana, has been chosen to chaperon forty of these animals on their journey to the Argentine republic, by which they have been purchased.

Miss Richards also has charge of the purchasing of the goats, which must be of the finest type, as they are to be used at a government agricultural school. The order was first delivered to an agricultural school in this State, which named Miss Richards as the most competent person, both for the purchasing and the caring for the animals during their sea voyage.

Difficulty was encountered in obtaining the consent of the Argentine republic for a woman to undertake the mission, as the South American purchasers said they were not used to women in business.

were not used to women in business.

Special arrangements also had to be made with President Harding for Miss Richards to be allowed to travel in the first cabin of a Shipping Board ressel, which will transport the goats. It is customary for passengers transporting animals to travel steerage, Miss Richards learned.

Present plans are for the goats to be shipped about May I, either from Los Angeles Harbor or from San Francisco. Miss Richards favors Los Angeles Harbor, as she is buying the goats in the Southland and wants to spare them all the iravel possible.

Ruling Given on Sale of Stocks by Individuals

A decision of considerable interest to owners of oil stock who de-sire to sell their holdings was made sire to sell their holdings was made by Justice Follette yesterday in dismissing the case of A. K. Shrader and ten other persons arrested on John Doe warrants, secused of vicilation the Corporate Securities Act. Mr. Shrader admitted that he sold a one one-hundredth royalty in an oil well in the Signal Hill district to C. H. Frary, 336 Sixty-first street. The District Attorney's office contended that such a sale was a violation of the Securities Act when made without a license. Justice Follatte, in dismissing the case, declared that the sale had been made by the owner of the stock to another individual and did not coincide with the usual stock sale, where an agent is employed.

ON VOYAGE Certain-teed Roof

The smoke screens of industry play havoc with roofs that are not built to withstand the ravages of fumes, gases and sparks. Here, enduring roof quality is essential-not only for the protection of machinery and materials but for uninterrupted operation of the plant. Certain-teed Smooth Surfaced Asphalt Roofing is writ-ten into the specifications of industrial engineers with complete confidence on account of its dependable quality, reasonable first cost and long life. It is this through-and-through quality which has made Certain teed the preferred roof for every type of structure, from the great industrial plant to the modest farm building, where resistance to the extremes of weather is a prime essential.

DAY MORNING.

And you do just a little more work than the elevating machinery of a cement plant does in the course of manufacturing a barrel of portland cement.

In a typical plant, the materials for a 376-pound barrel of cement-which weigh more than twice that to start with-have to be elevated fifteen times to heights ranging from 20 to 90 feet in going through the more than eighty operations between raw materials and finished product.

Practically all of this lifting and carrying is nowadays done by mechanical conveyors. Many of these are very ingenious.

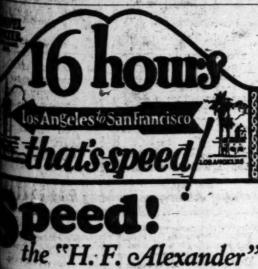

They may be endless chains of moving buckets that go trailing all about the plant, picking up and dropping different loads two or three times in the course of their journey. They may be wide belts.
Or they may be huge "cork-screws" fitting snugly inside steel tubes and pulling the materials

One of these coakscrews may be 100 feet long; one of the belts a quarter of a mile long.

In a medium sized plant—one with a million barrels capacity a year—an investment of more than a quarter of a million dollars is necessary for machinery that does nothing but carry and lift.

Conveying and elevating are among the great variety of opera-tions in cement making.

"TIMES" RECIPE CONTEST

Prize List and Rules

The Times recipe contest, which began January 13, com-prises seven separate contests, each covering a different branch of cookery. The contests embracing soups, fish, meats, vegetables and salads have been completed, leaving the two most interesting divisions for the last—desserts, and Spanish dishes. Both these contests are now open and every housewife in Southern California is invited to participate. Recipes must be submitted before midnight, April 7, and prise-winners will be announced in The Times of April 14.

For Best Dessert Recipes Three prizes will be paid, first prize, \$10; second prize, \$7.50; third prize, \$3. This class includes cakes, pics, puddings, frozen

For Best Spanish-Dish Recipes Two prizes will be given; first prize, \$10; second prize, \$5.

Honorable mention will be given worthy recipes which do not win prizes. The Times reserves the right to print any recipe submitted in its columns or in book form. KIDNEYS BOTHER

Take a Tablespoonful of Salts if Back Pains or Bladder is Irritated

Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forms acids which almost paralyze the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or stick headache, dizziness, your stomach sours, tougue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

LAURETTE MAY RETURN RUMOR NOW CURRENT THAT SHE'LL JOIN GOLDWEN

By Edwin Schallert
The success of Lauretts Taylor in her first picture, "Peg O' My Heart," may shortly be carried on —this time with the Goldwyn organization. At least, reports any that she is about to be engaged for several pictures at the Culver City studio, and it is not improbable that the first of these will be directed by King Vidor, who is already under contract to Goldwyn's and who made "Peg O' My Heart."

Miss Taylor has been playing on the stage in "Humoresque" adapted from the Fannie Hurst story, which has already been seen on the screen. She has about terminated his engagement, and it is reported she has had several large offers to return to the films; but that the Goldwyn deal looks the most promising. By Edwin Schalleri

Another star who is shortly to be seen in a Goldwyn picture is Blanche Sweet. This will not be "Tess of the Durbervilles." although she will probably make this later with Marshail Nellan direct-

Sound Testimonial Evidence aboving the power of Lydia E. Pinkham's Vegetable Compound over the ills of women is constantly being published in this paper. The strongest recommendation any article can have is that borne by the persons who use it. Once ill with aliments that caused suffering and despair, but now restored to the joys of health, from a grateful heart multitudes of women write letters of appreciation to the Lydis E. Pinkham Medicine Co. of Lynn, Mass. Such evidence of the power of Lydia E. Pinkham's Vegetable Compound over the ills of women should induce every suffering woman to try it.—[Advertisement.
